Preface

The Europe Aid Foundation is a humanitarian organization based in the Netherlands that reaches out to all segments of society and advocates for individuals in need.

The ultimate goal of our foundation's activities is to build a fairer world, make essential rights accessible to all global citizens, and ensure equal opportunities.

In line with this goal, with the valuable collaboration of our generous donors, we have implemented many significant projects in various countries worldwide, addressing the needs of tens of thousands of people in need.

About Europe Aid Foundation

Founded in 2009 with the belief of being a gateway to goodness on behalf of philanthropists, who can extend their helping hand to even the most inaccessible needy people on the other side of the world, the European Aid Foundation is an organization that has emerged with the aim of reaching out to all disadvantaged and needy individuals worldwide.

As the European Aid Foundation, we prioritize identifying disadvantaged regions among the poorest 15 countries based on reports from the United Nations and other international organizations.

We identify regions affected by crises such as natural disasters and conflicts and collaborate with partner organizations to provide assistance.

One of the most important things we do as a foundation is that we do not discriminate in the distribution of aid.

We extend a helping hand to needy victims without discrimination based on religion, language, gender, or ethnic origin.

Water Well Project

The increasing world population and climate change are leading to a decrease in water resources and the emergence of water scarcity issues. According to international reports, 1 out of every 10 people struggles to access clean water, and 2 billion people lack access to clean water. Access to clean water in inaccessible regions, especially in areas like Africa and Asia, is a challenge we tackle as a dedicated foundation through well-digging projects.

By implementing innovative technologies and collaborating with local stakeholders, we work towards a brighter and water-secure future for generations to come. Additionally, by opening water wells in many oppressed countries, we provide them with the opportunity to access clean water, bringing smiles to their faces.
